

The graph displays the number of deaths from COVID-19 in the United States over time. The x-axis represents years from 176 to 200, and the y-axis represents the number of deaths, ranging from 0 to 100. The data shows a significant increase in deaths starting around 177, peaking around 178, and then fluctuating with a general upward trend until 200.

Year	Deaths
